Greeting

Korea Trading & Industries Co. Ltd was founded in 1987 as a fishing net producing company and we have been delivering and exporting fishing nets and other relating materials on the base of high quality to domestic important shipping companies and other foreign contries, especially Russia, through worldwide.

Though establishing second factory(Metal Business Division) and expanding Trade office(K.T.I. CO., LTD.), we are young and ambitious company to explore new market.

Due to our best manufacture's system, we can now produce not only fishing nets but also various designed equipments including trap pots relating to fisheries industry.

We can especially satisfy focusing on new technology and research and be ready for various needs and demands of our customers at anytime, anywhere and we will ceaselessly pay our efforts to acquire better technology to produce better products to make your dream possible for a good catch.

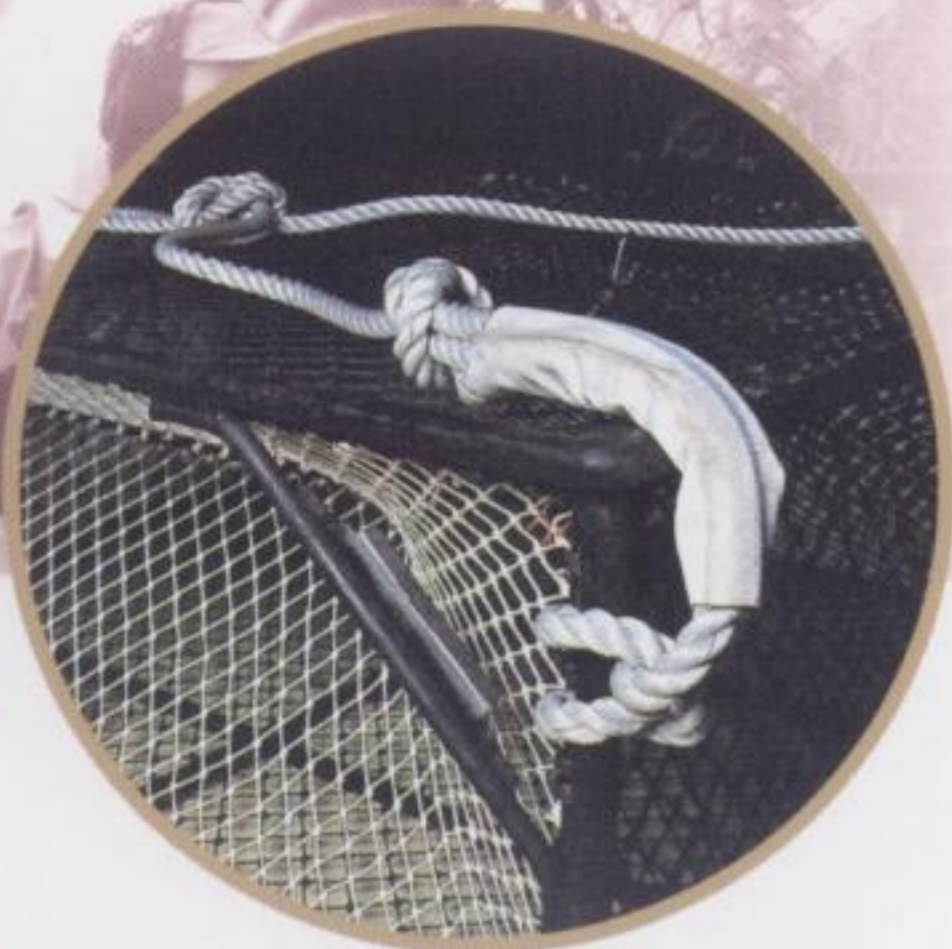

Our faith for making better products and services will be going on in the future.

Best regards.

THE PRESIDENT OF KOREA TRADING & INDUSTRIES CO., LTD

ILL-TAE SUE

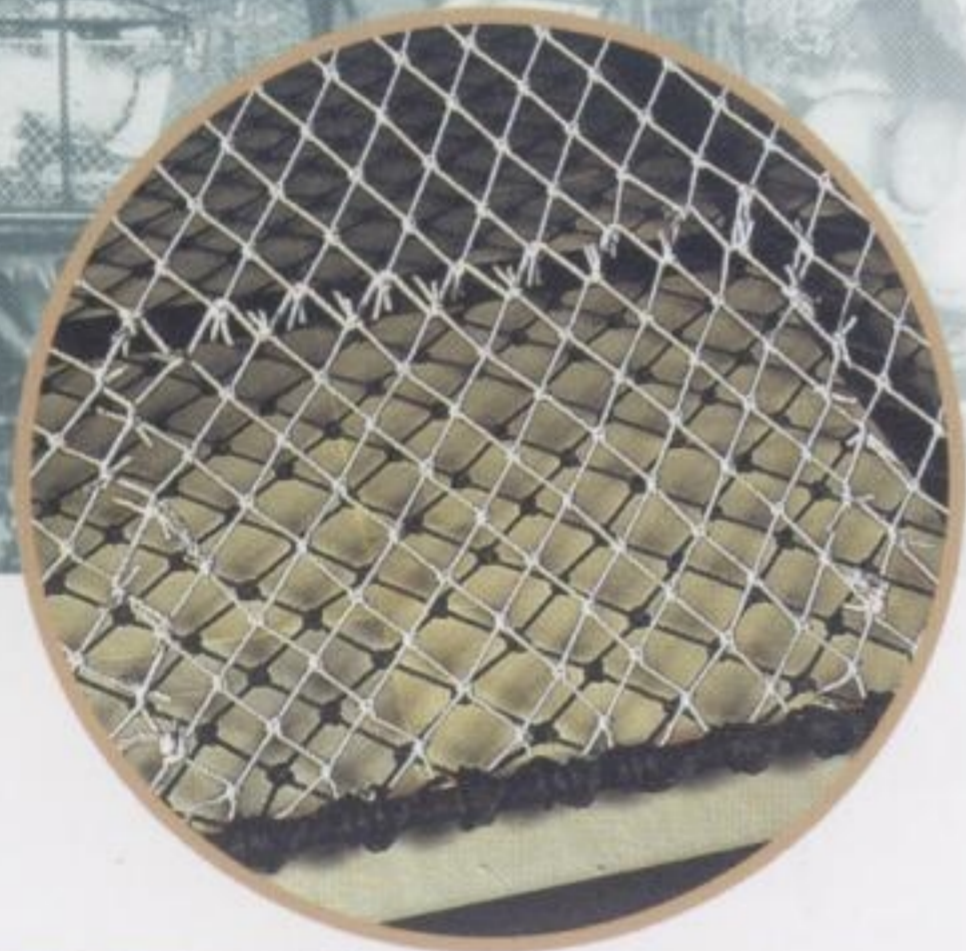

ENDDOOR CRAB POT

Our enddoor crab pot is a well known to professional fishermen within the king crab catching industry. For 6 years we have been developing, manufacturing and selling them for professional use.

After 5 years of rigorous testing by many times or so professional fishermen on the oceans of the world, we now introduce our traps.

Our steel materials used are of hot rolled treated, is unquestionable the most strong and resistant to damage by tough crabs catching situation ever created.

And rugged construction and stress-relieved welds designed to withstand rough bottoms strains and onboard handling.

The netting is made of 100% nylon, this is twisted and knitted, after which it is processed through special odorless coating. and cotton twine is cut at 1 meter in length, is biodegradable and will dissolve after 60 days in water, allowing crabs to escape, keeping pace with conservation of marine resources.

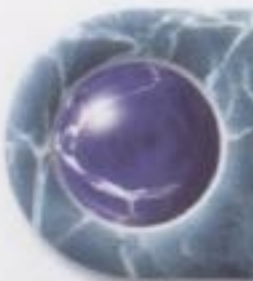

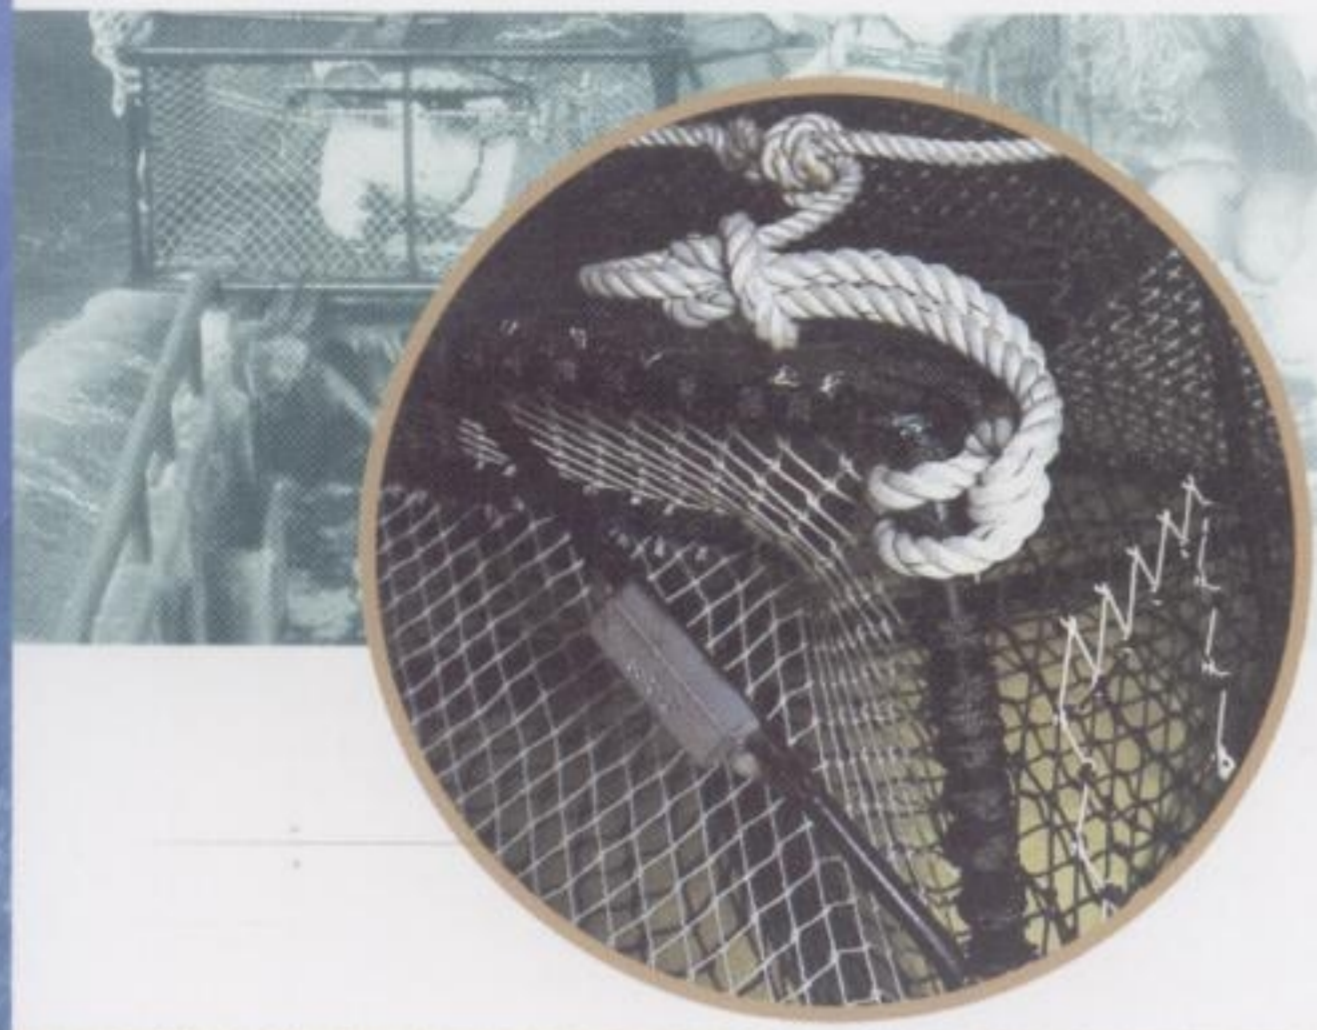

ENDDOOR CRAB POT

PRODUCT CODE	DIMENSIONS (mm)
No. 1	2,130×2,130×850
No. 2	2,130×2,440×850

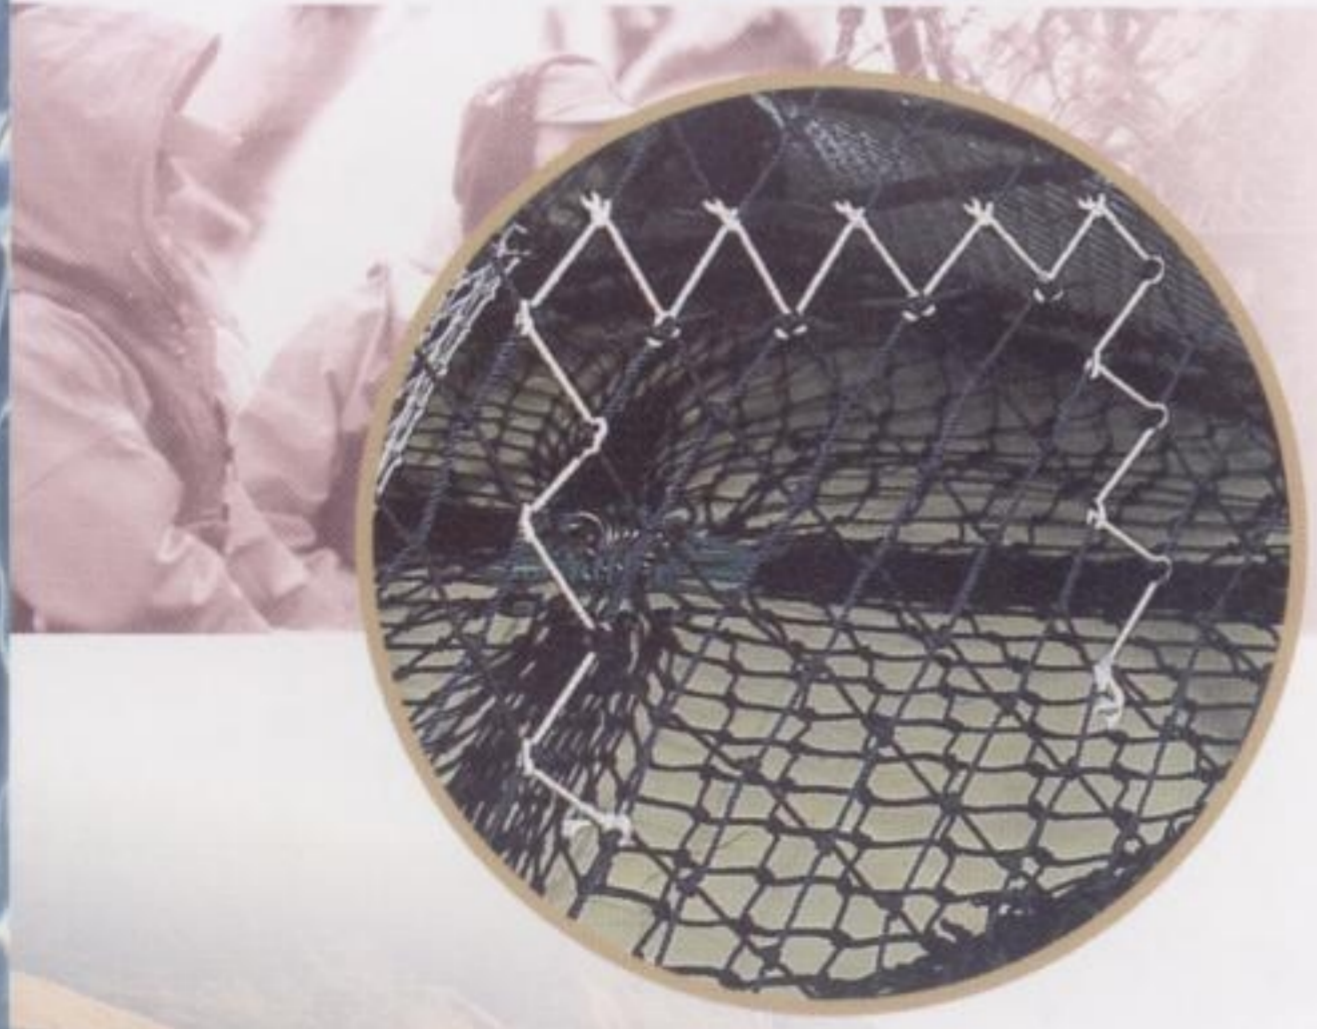

PYRAMID CRAB POT

Pyramid crab pot is designed to be used in more smaller deck floor comparing with another crabbers using Enddoor crab pots. it is available to be piled up. The material of steel and nets are same with the ones of Enddoor crab pot.

Zink plate plays an important role to prevent the oxidization of steel construction in the water and an excellent tightly knotted nylon net which offers exceptional strength with the proper shrinking, keeps the tention of nets panels on each side constantly.

Improved coatings are a family of abrasion resistance coatings which are specifically formulated to match end-user requirements and specific crab pots constructions : The advantages and differences of these coatings are outlined below:

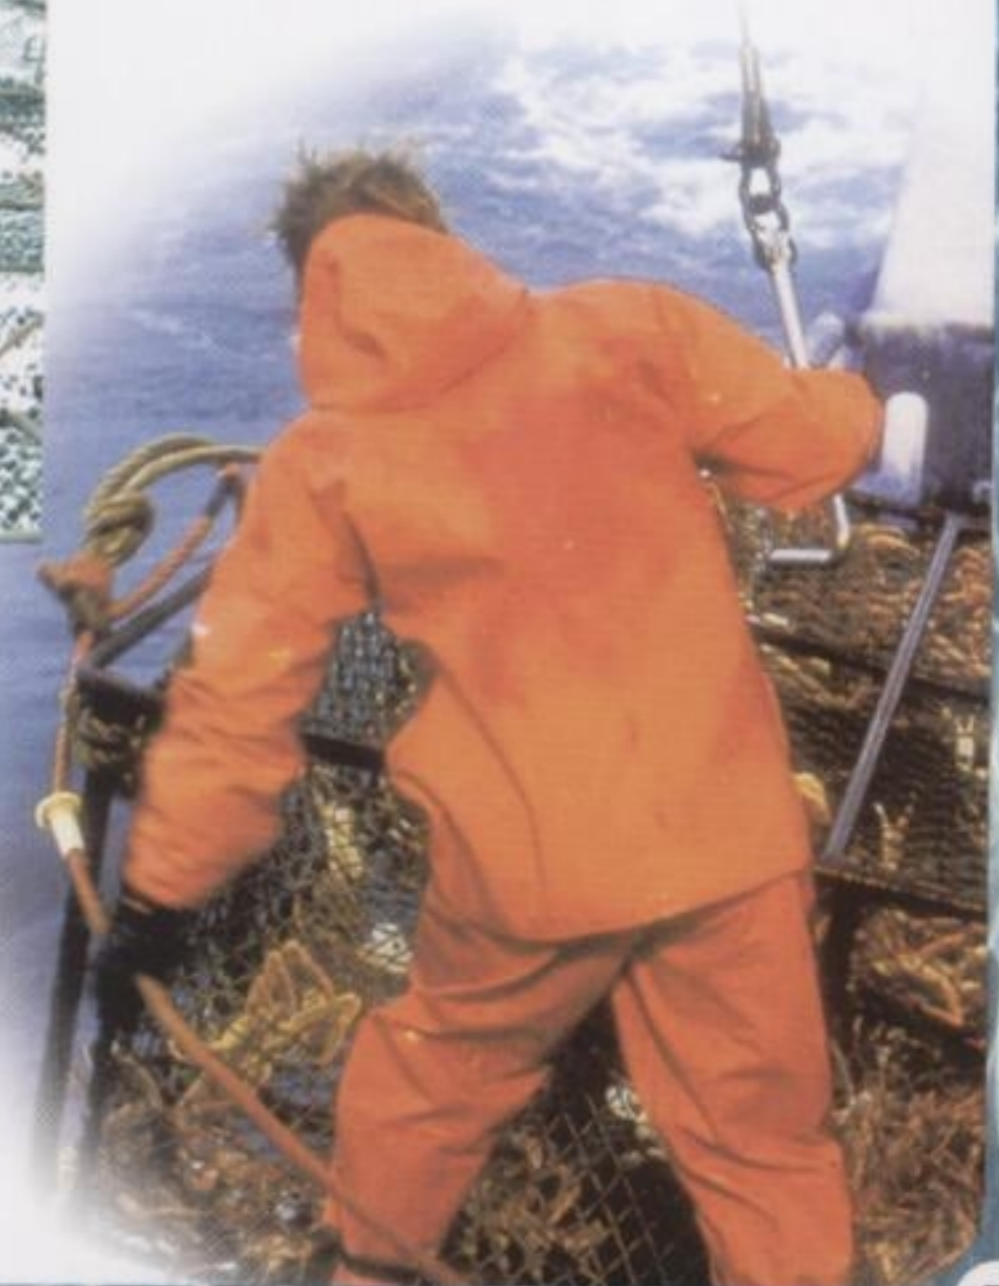

- Enhances abrasion resistance
- Reduces cuttings
- Reduces snapping
- Prevents contamination
- Enhances easy crabs' entrance

Pots Arrangement

Crab Ropes

KING CRAB FLOATING ROPE

A 100% monofilament polypropylene, 3-strand twisted rope preferred for its excellent coilability, strength and uniform consistency of construction.

Its special hard lay construction resists hockling and back turning. This is the perfect line for the heavier traps, deeper depths and stronger currents prevalent in king crab fishing. It is resistant to damage by rot, oil, grease, marine growth and most chemicals.

STANDARD COLOR : YELLOW WITH 2 DISTINCTIVE TRACERS

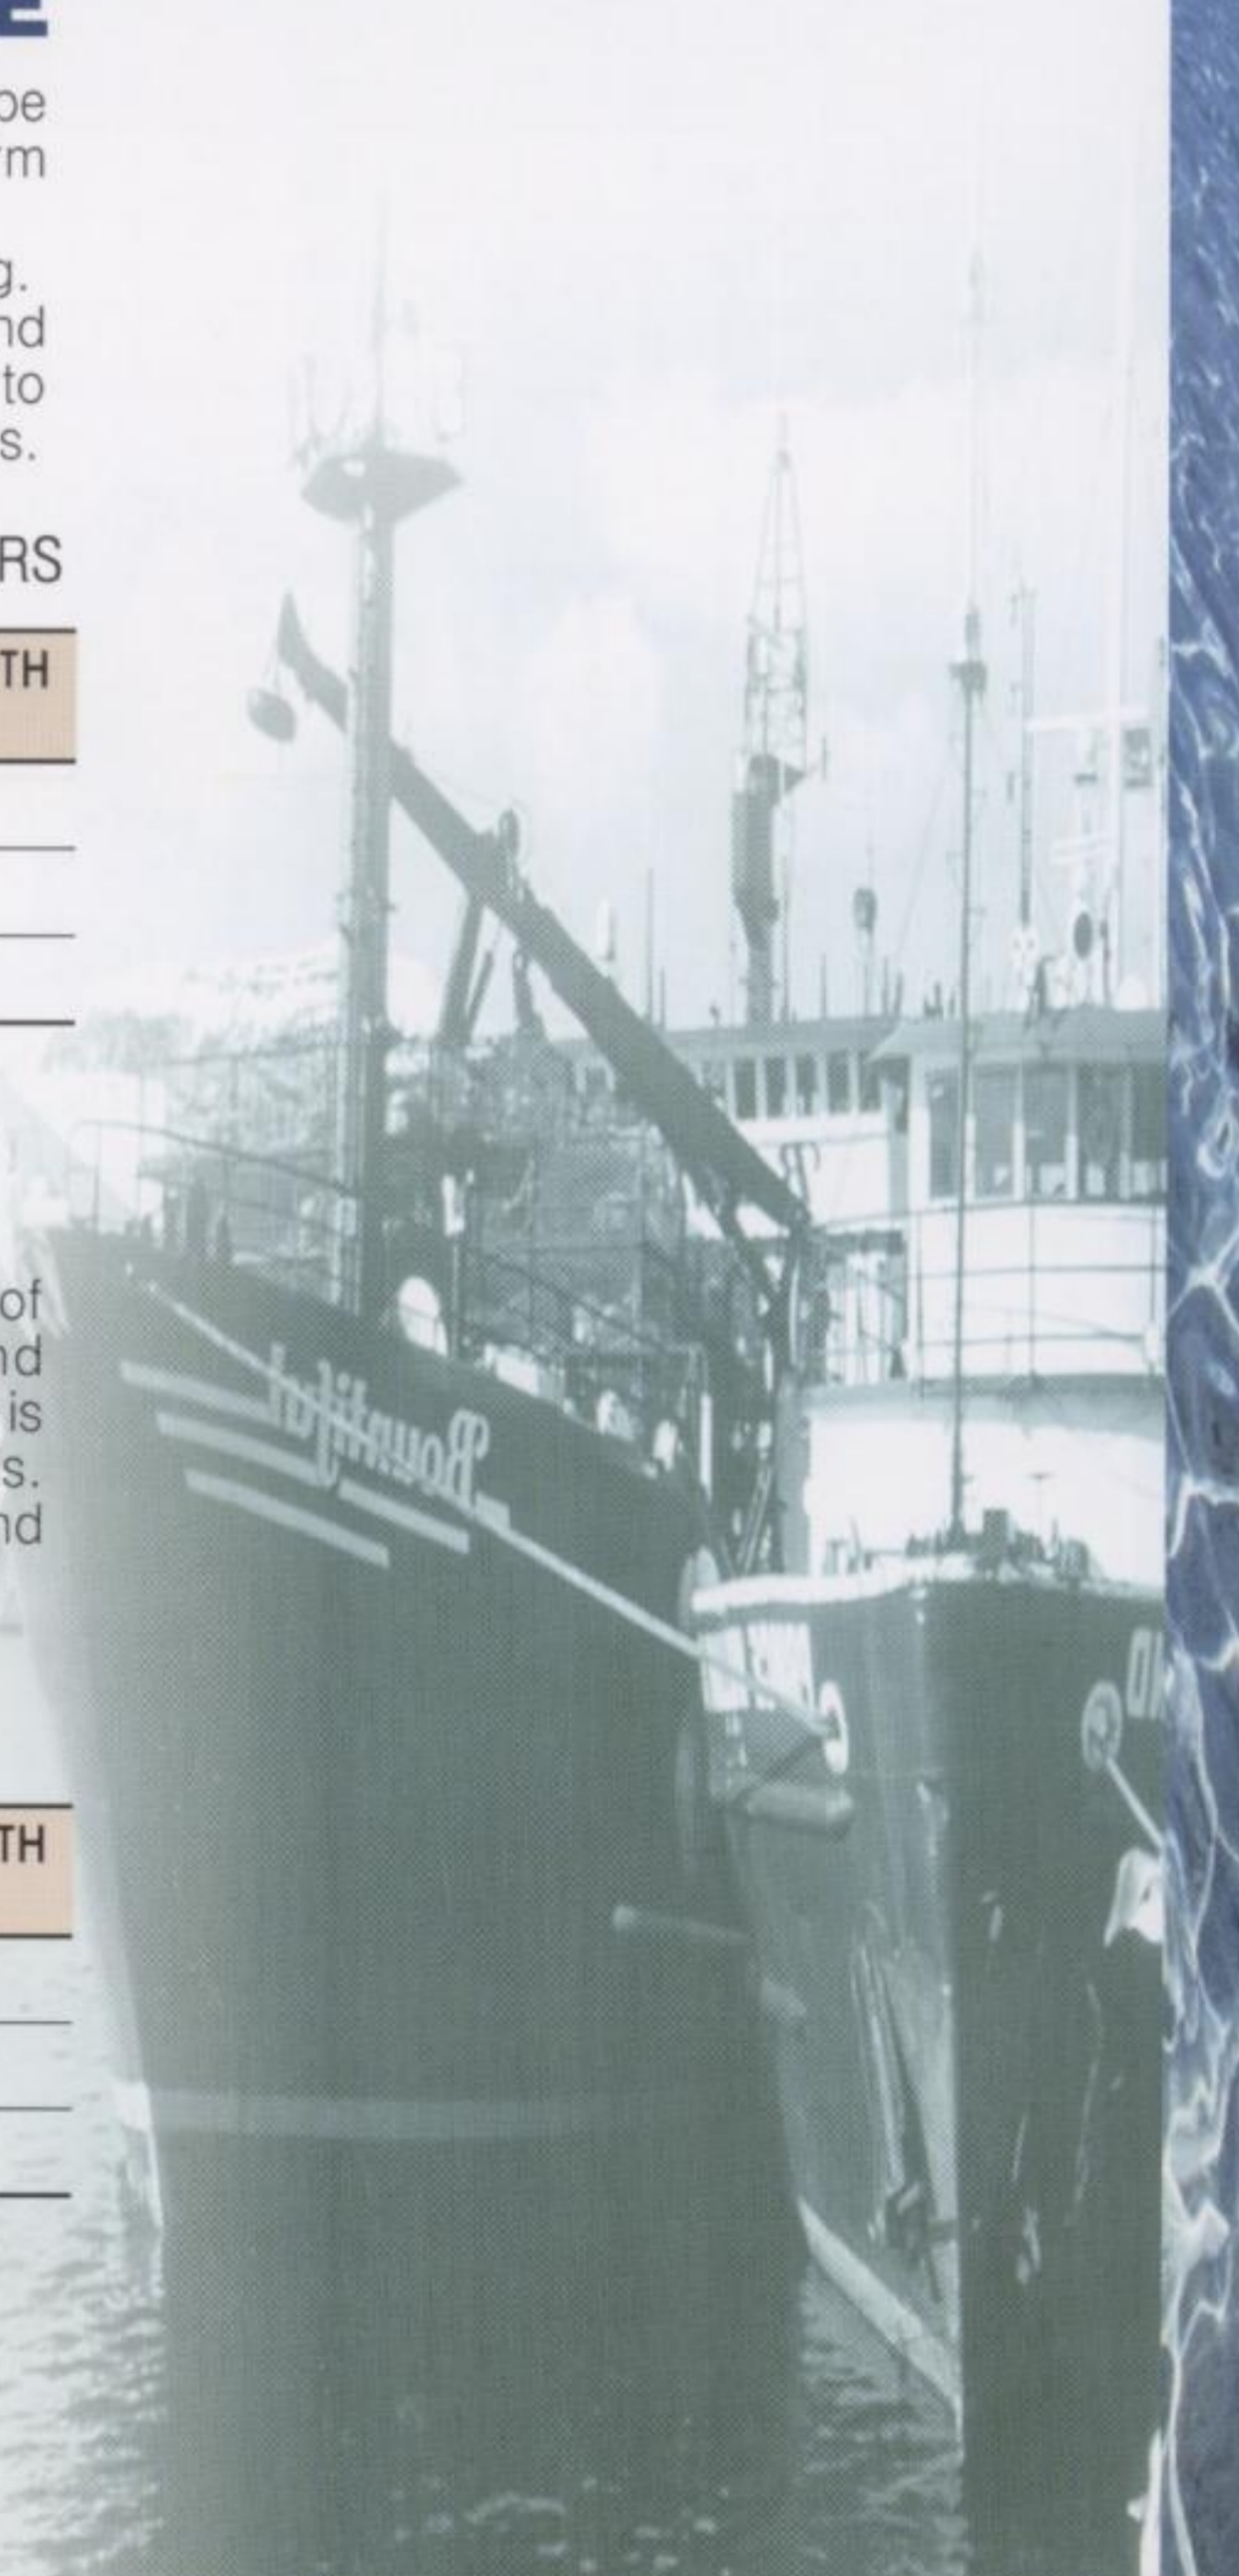

DIAMETER (in.) (mm)	APPR. WEIGHT (kg / 200 m)	AVERAGE BREAKING STRENGTH (ton)
5/8 16	24.2	3.8
3/4 19	34.5	5.2
7/8 22	46	6.9

KING CRAB SINKING ROPE

This exceptionally strong, light weight rope is a combination of polyester and polyolefin in a special hard lay, 3-strand construction making it an excellent crab traps sinking line. It is resistant to damage by rot, marine growth and most chemicals. Excellent abrasion resistance combined with high strength and low elongation are this rope's outstanding characteristics.

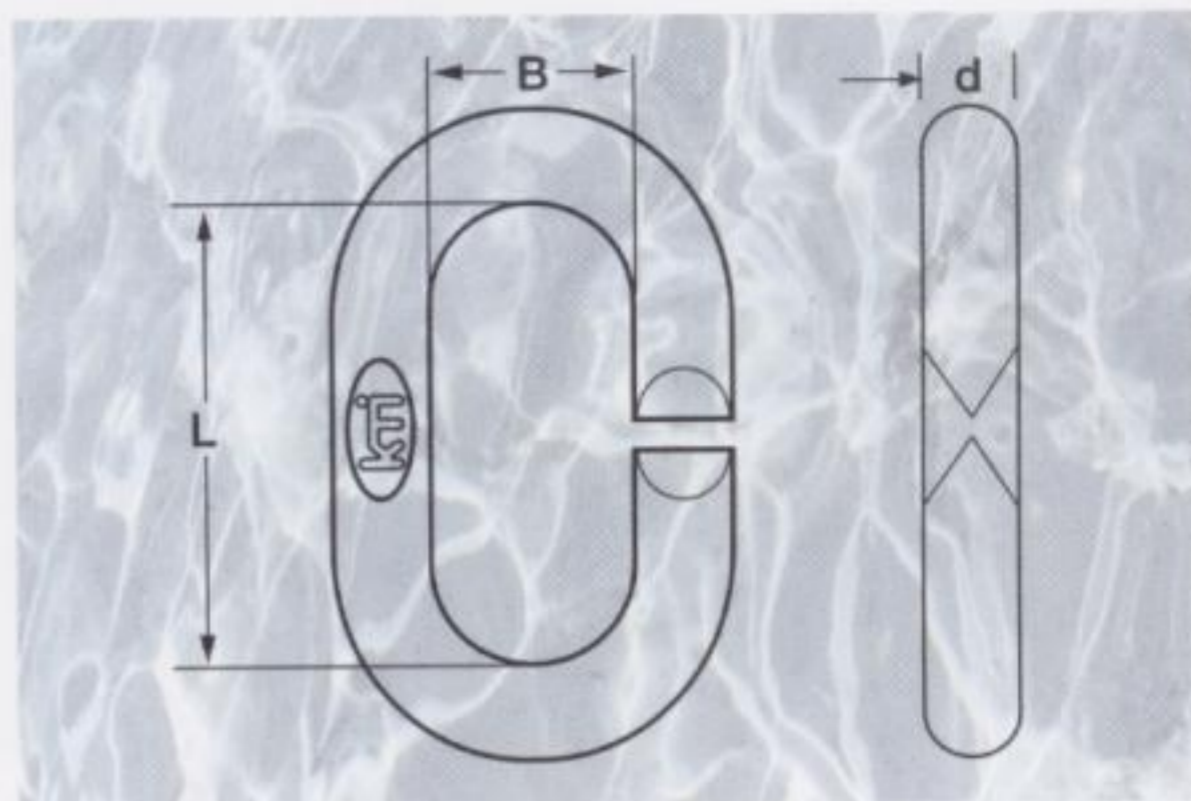

STANDARD COLOR : NATURAL SILVERY WHITE WITH 2 DISTINCTIVE TRACERS.

DIAMETER (in.) (mm)	APPR. WEIGHT (kg / 200 m)	AVERAGE BREAKING STRENGTH (ton)
5/8 16	31.9	5.2
3/4 19	42.3	6.4
7/8 22	58.0	8.5

ACCESSORIES FOR POTS

PUZZLE RINGS

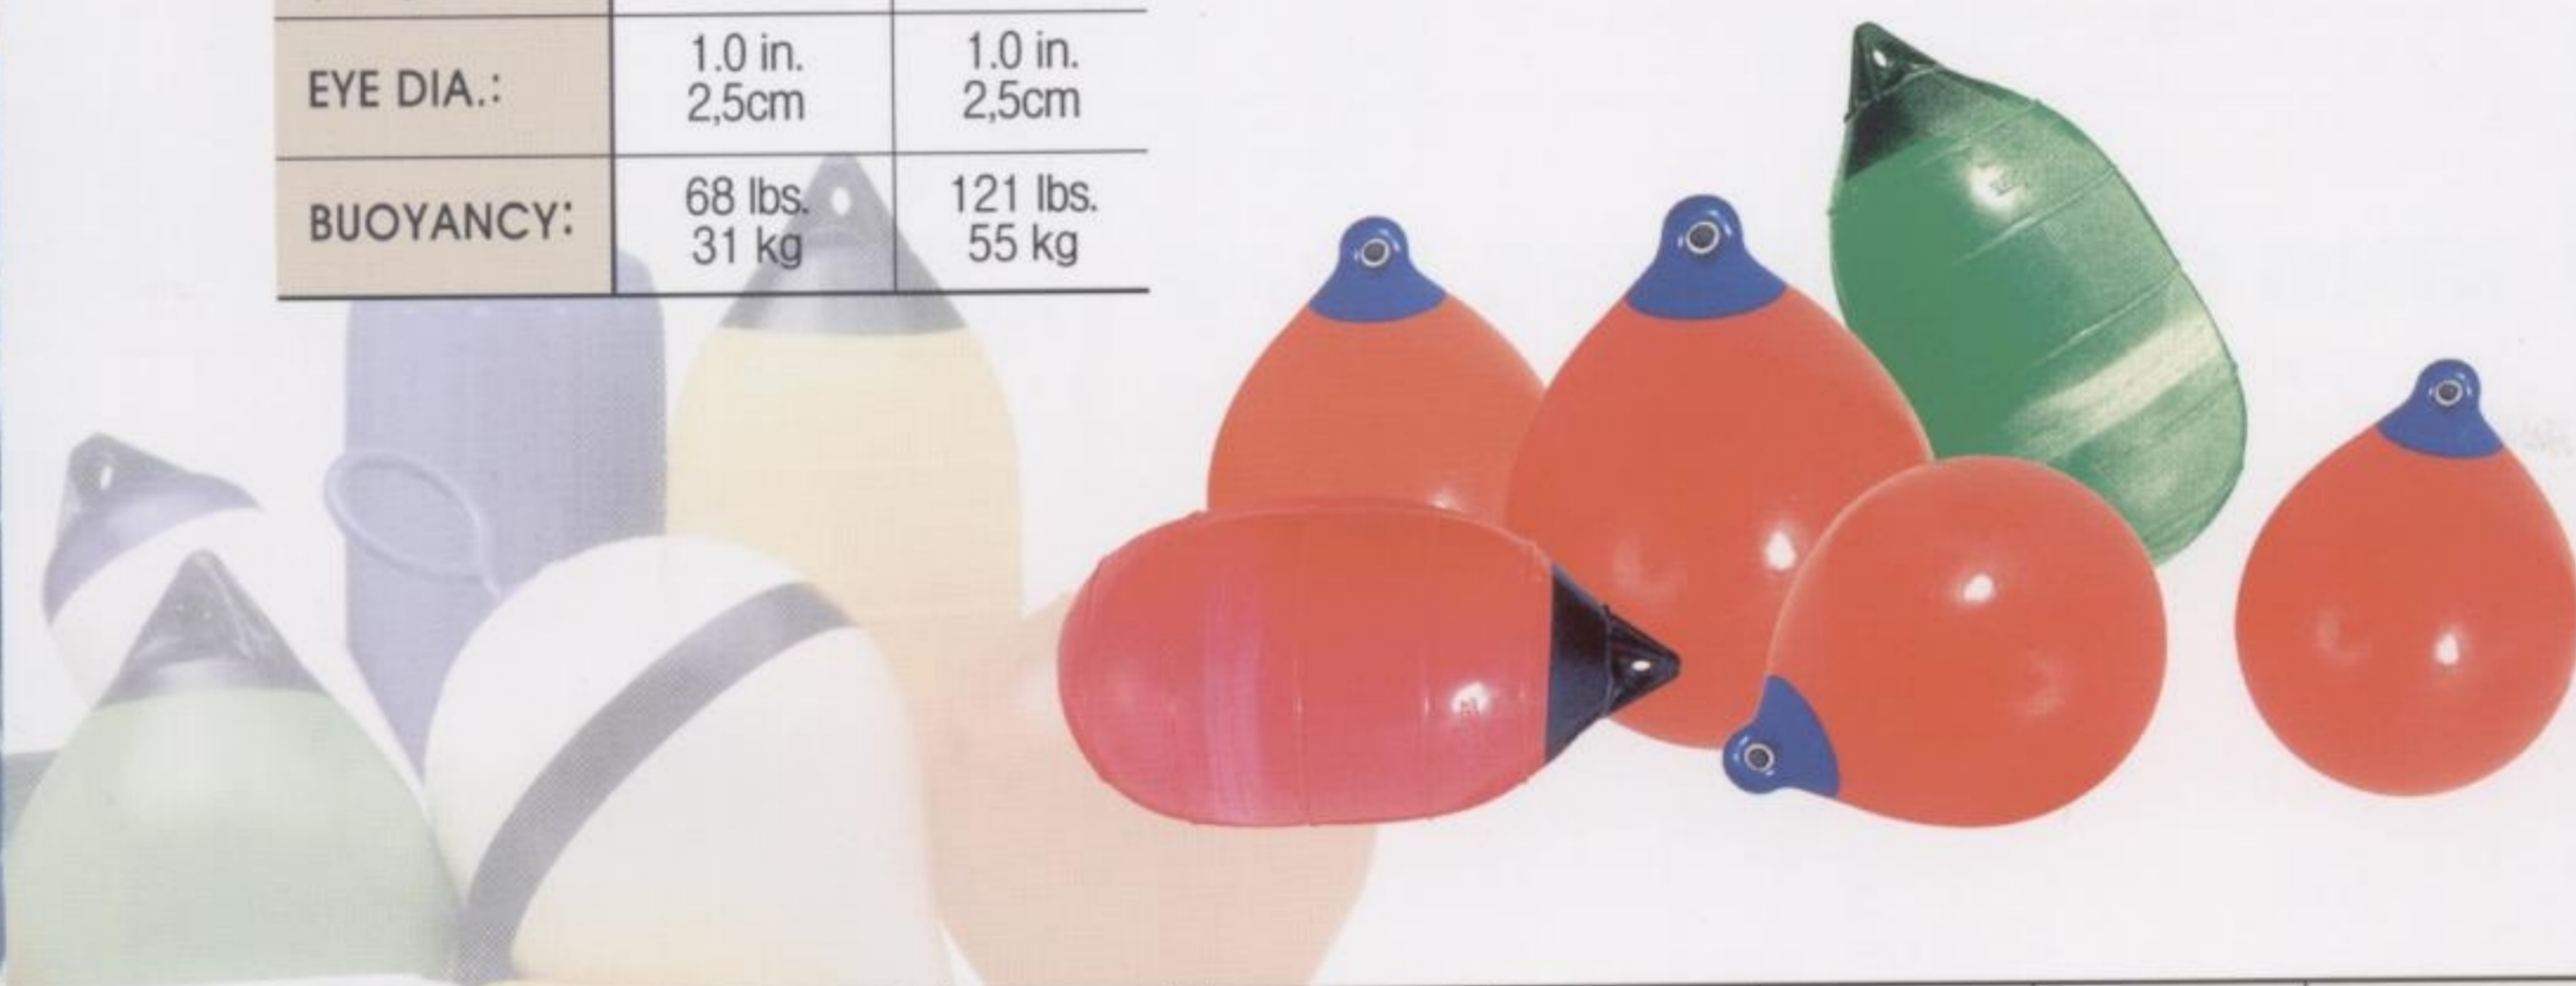

A quick, non-fouling link connecting system, easier to use than snaps or shackles.
